

EASY TO GET STARTED | EASY TO USE | EASY TO EXPAND

Workflow^{RT} enables radiology departments to:

- Eliminate registration lines
- Reduce congestion in waiting areas
- Decrease patient wait time
- Enhance patient and staff safety
- Enhance staff communication and visibility
- Provide data to make decisions
- Remove bottlenecks and improve throughput

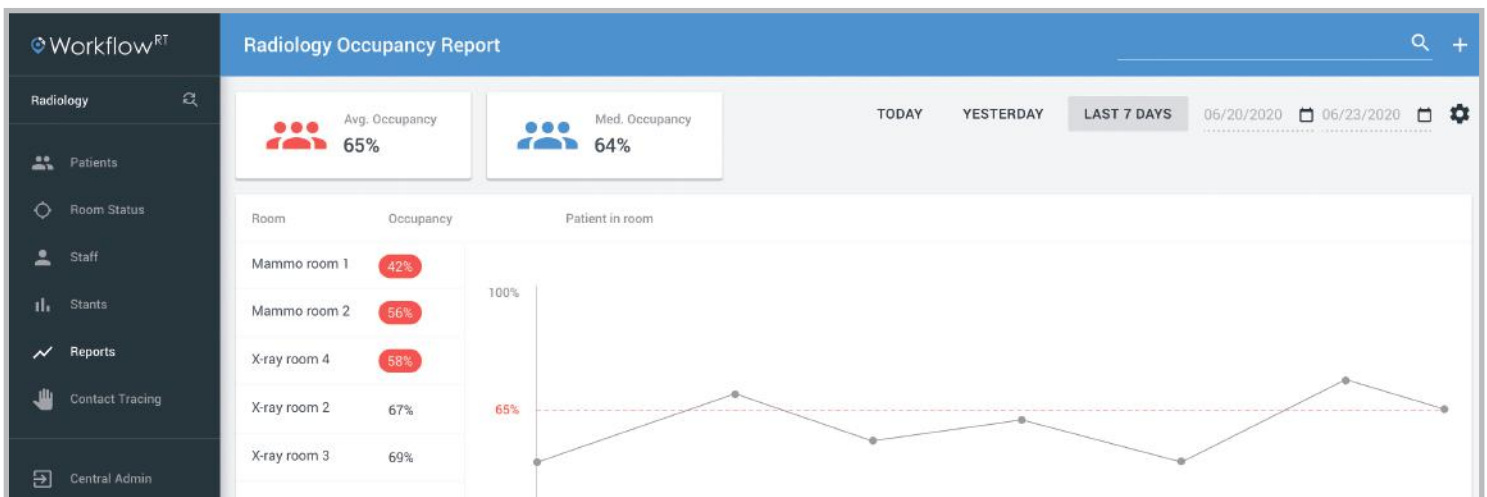

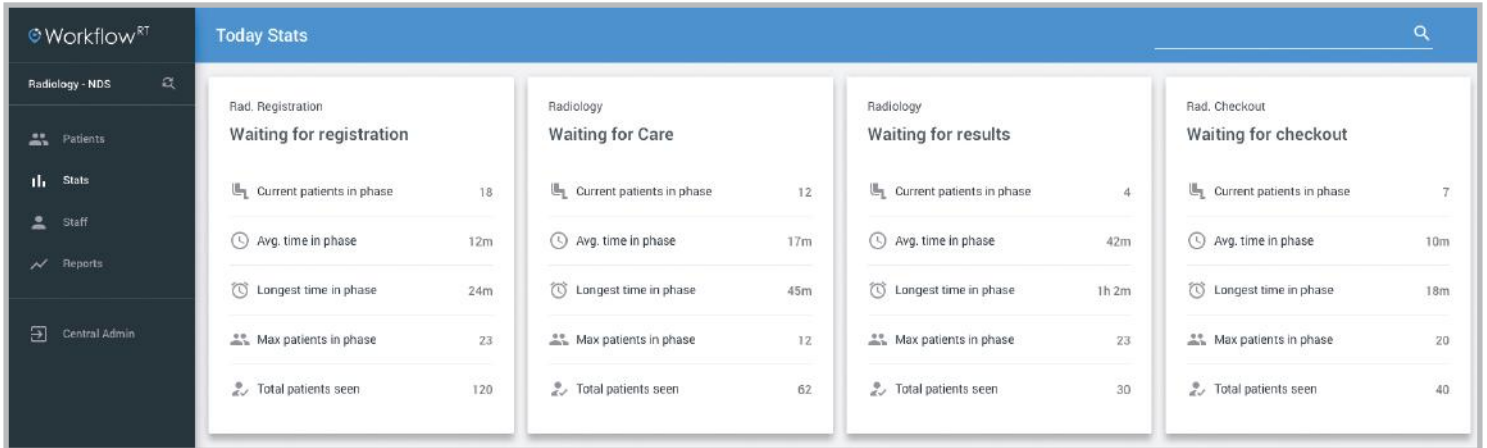

Workflow^{RT} is a user-friendly cloud-based patient flow solution that automates workflow and communication in radiology departments using real-time location technologies (RTLS).

Full Name	Appointment	Location	Phase	Phase Duration	Staff	Attended Time	Time in Department
Fly, Tracy	03:15 PM	X Ray 2	Xray	12m	Boe, Molly	1m	33m
Pueze, Maranda	02:45 PM	Radiology Bay 1	Radiology Nurse	12m	Day, Tom	4m	31m
Staffne, Tayna	03:00 PM	Radiology Waiting	Waiting for Care	11m	-	-	17m
Anderson, Brad	03:15 PM	Radiology Waiting	Waiting for Care	11m	-	-	18m
Schwarzrock, Amber	02:00 PM	Radiology Waiting	Waiting for Care	10m	-	-	20m
Besler, Jamie	02:15 PM	Radiology Waiting	Waiting for Care	9m	-	-	15m
Steffes, Mary Jo	03:15 PM	XRAY 1	Xray	8m	Czeczok, Abby	2m	22m
Lynne, Valerie	12:45 PM	CT Room 5	CT	8m	Gregg, Danielle	6m	12m
Clooter, Ned	02:30 PM	Radiology Bay 2	Radiology Nurse	6m	Larson, Leila	3m	23m
Aasen, Susan	03:30 PM	Mammography Room 2	Mammography	5m	Schwartz, Paula	4m	25m

Workflow^{RT} gives your team real-time visibility into the current location and status of your patients throughout their radiology visit. It allows staff to **manage their workflow** and **be aware of bottlenecks, long wait times, and unattended patients.**

Workflow^{RT} also enhances patient and staff safety by eliminating registration lines, reducing congestion in waiting areas, and automatically collecting data for contact tracing purposes.

Workflow^{RT} also provides your team with the necessary tools to drive continuous process improvements. With dashboards and built-in reports you can keep tabs on your key metrics to start tackling areas for improvement and measure results.

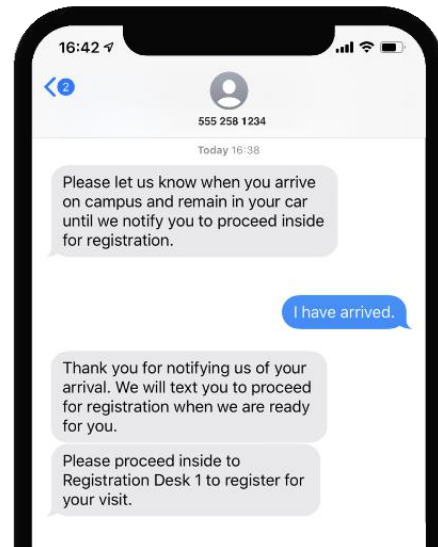

With Workflow^{RT}, you can automatically track all interactions among patients and staff and instantly identify those at risk of exposure if a positive test for an infectious disease, such as COVID-19, has been identified within the facility.

Contact Name	Contact Type	Phone	Duration of Contact
Jeremy Jones	Staff	-	6 minutes
Jesse Long	Patient	555-110-0910	20 minute 35 seconds
Mary Swanson	Patient	555-894-9898	10 minutes
Dave Gore	Patient	555-093-1123	4 minutes 20 seconds

Report for: Patients > Jenny Smith
Contact Report: Jenny Smith - MRN#1234 - Tag 1236 - 555-666-5454

With Workflow^{RT}, you can enable your patients to check in from their vehicles without having to stand in registration lines or staying in a waiting area while waiting to be called back for care.

With automated text messages, family members get instant updates on which phase of care their loved ones are in. This enables family members to receive timely updates whether they are in the waiting room, in the car, at home, or across the country.

Family members can also see the patient's progress on display boards located in the waiting areas.

Radiology							
Aab G	In Xray	Bra B	In Xray	Doe M	Post Xray	Mar P	In CT
Aba A	Post MRI	Cal T	MRI Prep	Fab S	Waiting for Care	Mar Q	Post CT

Ana E	Waiting for Care	Cam L	In Xray	Fat A	Waiting for Care	Mel A	MRI Prep
Bar B	In CT	Can T	In CT	Foe M	CT Prep	Mir D	In MRI

WORKFLOW^{RT} KEY FEATURES:

- Workflow view with patient location, patient phase of care, and staff interaction
- Workflow configuration flexibility, including unlimited workflows, nested workflows, concurrent workflows, and non-sequential phases in workflows
- Automatic visual alerting of bottlenecks and extended durations
- Staff view boards showing status and location of all patients
- Family view boards displaying patients' real-time status to keep family members up to date during the care process
- Patient view boards with estimated wait times
- Patient queuing for registration and care
- Automatic family and patient messaging
- Process analytics giving visibility into process bottlenecks
- Contact tracing report
- Quick and easy system setup and system administration
- Scalable from a single department to an entire enterprise
- Part of an integrated suite of products

LOW COST. HIGH VALUE

Workflow^{RT} is the most affordable patient flow solution on the market. With a **low-cost monthly fee**, you can start using the system right away and see its positive impact from day one.

EFFORTLESS TO SET UP AND MAINTAIN

Workflow^{RT} is lightweight, cloud-based, and significantly faster to install than traditional RTLS patient flow solutions. You can be up and running in only a few hours. **We handle all updates and maintenance** so you can focus on your patients.

EASY TO USE

Workflow^{RT} is designed to be easy to use. Patients can be called to registration with no need to wait in lines. Staff can view live status view boards for all the information they need at a glance. Family members can get important updates via text and view boards. The best part? **All information is updated automatically, with no manual entry needed.**

SCREENS^{RT}

System information is available via large-screen monitors for patients, visitors, and staff.

Screens^{RT} is a pre-configured HDMI stick that enables workflow, patient, and family view boards from the Workflow^{RT} product to be displayed on your screens. This brings value to your staff with quick views of patient workflow information and gives families and patients status updates and estimated wait times.

KIOSK^{RT}

Eliminate registration lines and reduce congestion in waiting areas.

Kiosk^{RT} allows patients to check in on their own. Patients can then be notified when it is time to register or time to proceed for care via patient view boards or text messaging.

EASY TO INSTALL | **LOW COST** | **REMOTE SUPPORT**

INTEGRATE^{RT}

Optimize your Workflow^{RT} product and save your registration staff time with Integrate for Workflow^{RT}.

With Integrate^{RT}, clinics and procedural areas using Workflow^{RT} can eliminate double entry between the Workflow^{RT} product and your EHR. The Integrate^{RT} Core Engine leverages the outbound broadcast connector, which broadcasts patient association and dissociation messages with Prompt.Health products. This allows patient name and demographic data to seamlessly flow into Workflow^{RT} and eliminates the need for double entry. It also verifies there is an acknowledgement from each receiving application to ensure data integrity among the applications being synchronized. This not only saves time but ensures all patient information is entered accurately.

Integrate^{RT} can also bring scheduling information from your EHR or scheduling system into the Workflow^{RT} product, using the Integrate^{RT} Patient Scheduling Connector. This enables the product to automatically display appointment time and provider, giving your staff more context to help optimize their work.
